Fazaia Colony, Rawalpindi

PROFESSIONAL SUMMARY

Computer Science senior with hands-on experience building full-stack web and mobile applications, integrating ML models via REST APIs, and delivering client projects freelance. Skilled in Python, Flutter, and AI/ML tooling including computer vision, RAG pipelines, and local LLM integration. Comfortable working across the stack from frontend UI to backend APIs to model deployment.

EDUCATION

Bahria University Islamabad , Islamabad Bachelor of Science in Computer Science	2022 – 2026 (Expected)
OPF Boys College H-8/4 , Islamabad HSSC – Federal Board (Science)	2020 – 2022

EXPERIENCE

IT & Accounts Assistant — Himmeltek International (family business)	Ongoing
• Support day-to-day accounts operations and record-keeping. • Building an AI agent that logs transactions from mobile inputs into Excel ledgers.	
Web Developer Intern — Megatronix Studio Pvt Ltd, Islamabad	Jan 7 – Jan 20, 2026
• Worked on WordPress development and basic Photoshop tasks. • Built a demo website as part of the internship deliverables.	
Freelance Web Developer	Summer 2025
• Designed and built two client websites end-to-end. • Delivered responsive layouts and basic content management to client requirements.	
Web Developer Intern — Megatronix Studio Pvt Ltd, Islamabad	Jan 19 – Feb 2, 2025
• Front-end development using HTML, CSS, and Bootstrap. • Implemented GSAP-based animations across two demo sites.	
Freelance Front-End Developer	Feb 13, 2023
• Built the front-end of a Payroll Management website using HTML and CSS. • Developed responsive UI components per client specifications.	

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, PHP, Dart, HTML, CSS
Frameworks & Libraries: Bootstrap, GSAP, Flutter, OpenCV, MobileNetV2, Ollama, Flask
AI & Machine Learning: Machine Learning, NLP, RAG, Computer Vision, Image Processing
Databases: SQL, MySQL, Firebase (NoSQL), XAMPP
Tools & Platforms: Git, GitHub, WordPress, Photoshop (basic), MS Office
Concepts: Data Structures, OOP, Full-Stack Web Development, REST APIs

PROJECTS

CivicSense (FYP) – AI-Based Civic Issue Detection & Reporting App

Python, Flutter, Firebase, REST APIs

- Built a mobile app to detect and report civic issues using Python, Flutter, and Firebase.
- Connected a custom machine learning model (92% accuracy) to the app using REST APIs so users can track complaints in real time.
- Wrote clean, maintainable code to simulate city boundaries and automatically route complaints to the correct department.
- Collected and cleaned the image data needed to train the AI model properly.

AI Fitness Chatbot & Gym Platform

Python, HTML, CSS, XAMPP, PHP, MySQL

- Built a web-based gym management platform with an AI chatbot recommending workout and nutrition plans based on user goals.
- Developed PHP/MySQL backend handling member registration, plan tracking, and an admin dashboard.
- Built the chatbot module in Python and integrated it with the web app via API.

FitGenius – Offline AI Fitness Chatbot

Python, RAG, TF-IDF, FAISS, Ollama, Flask, HTML, JS

- Developed an offline fitness chatbot using TF-IDF and FAISS retrieval over a 3,000-exercise dataset.
- Integrated a local Mistral LLM via Ollama for response generation without internet access.
- Built a Flask backend serving an HTML/JS frontend for the chat interface.

Vehicle Number Plate Recognition

Python, OpenCV, Tesseract OCR

- Built a plate detection and text extraction pipeline using OpenCV preprocessing and Tesseract OCR.
- Added timestamped logging of recognized plates for downstream auditing.
